Saeed Ullah

Junior Data Analyst | Reporting & BI | Operations and Inventory Data

Riyadh, Saudi Arabia (transferable Iqama) | Saeedtech990@gmail.com

linkedin.com/in/saeedullah-tech | github.com/saeedullah-tech | saeedullah-tech.github.io/Portfolio

PROFESSIONAL SUMMARY

Data analyst with a Computer Science degree and hands-on experience in SQL, Power BI, Excel, and Python. I currently reconcile stock across 400+ locations and 20,000+ items at Noon, and I have built 16 portfolio projects covering dashboards, KPI reporting, data cleaning, and SQL analysis. I turn operational data into clear reports that teams can act on, and I am looking for data, reporting, and analytics roles in Saudi Arabia.

CORE SKILLS

Business Intelligence: Power BI (DAX, Power Query, data modelling, star schema, drill-through, slicers), Tableau, dashboard design, KPI reporting

SQL & Databases: PostgreSQL, MySQL, joins, subqueries, CTEs, window functions, aggregate functions, views

Excel: Pivot tables and charts, Power Query, XLOOKUP, INDEX & MATCH, data validation, conditional formatting, dashboards

Python: Pandas, NumPy, Matplotlib, Seaborn, Jupiter Notebook

Data Analysis: Data cleaning, validation and transformation, exploratory and statistical analysis, trend and variance analysis, root cause analysis, ETL concepts, data storytelling

Tools & Languages: Git, GitHub, Google Sheets, Microsoft Office, R (basic). English (fluent), Arabic (intermediate), Urdu (native)

PROFESSIONAL EXPERIENCE

Inventory Associate | Noon, Riyadh — Oct 2026 to Present

- Reconciled stock counts across 400+ locations covering 20,000+ items to keep inventory records accurate.
- Investigated differences between system and physical stock and flagged mismatches for correction.
- Verified stock across multiple storage locations so availability data stayed reliable.

Data Clerk | Keemart, Riyadh — Aug 2026 to Sep 2026

- Maintained attendance records and goods updates so warehouse data stayed current and consistent.
- Prepared and organized goods-related documentation to support warehouse operations.

Data & Operations Associate | Travel & Visa Services Agency, Riyadh — Mar 2026 to Aug 2026

- Maintained trackers for visa applications, client bookings, and case status at high daily volume.
- Consolidated data from several intake sources into recurring management reports.
- Standardized Excel reporting templates, reducing the time needed to prepare weekly updates.

Document Controller | C&W, Pakistan — Mar 2024 to Sep 2025

- Organized project documents, records, and correspondence to company and client standards.
- Tracked submission, review, and approval cycles across multiple departments.
- Implemented a filing and version-control system that improved document retrieval and reduced duplicate errors.
- Maintained logs and registers that supported audit readiness and reporting.

DATA ANALYTICS PROJECTS

HR Attrition Analysis Dashboard | Power BI, DAX, Power Query, Star Schema

- Built an interactive dashboard to show HR leaders why employees leave, with KPIs and filters by gender, department, and job level.
- Found that employees earning up to 5K made up about 69% of the 237 leavers, 60% were entry-level, and most left within two years.

Oil & Gas Executive Dashboard | Power BI, DAX, Power Query, Excel

- Developed three linked dashboards (executive, financial, production) on a star schema to track revenue, maintenance cost, output, safety incidents, and CO2 emissions.
- Wrote DAX for YoY and MoM trends and target-versus-actual production, with drill-through so executives can compare countries and sites.

Inventory Management System | Excel, Pivot Tables, Formulas

- Created an Excel-only stock tracker where two entry sheets update the ledger, dashboard, charts, and pivots automatically.
- Added low-stock alerts that flag items in red and show the vendor's phone number, so re-ordering takes one glance.

Regional Sales Performance Dashboard | Power BI, DAX Time Intelligence

- Modelled about 10,000 orders (2022 to 2024) and wrote current-year, prior-year, YoY growth, and profit margin measures.
- Identified the South region as the weakest performer, with sales down 31% year over year.

Pizza Sales Analysis | PostgreSQL, SQL, Power BI

- Used SQL to calculate revenue, average order value, and category and size shares across 21,350 orders and 49,574 pizzas (817.86K revenue).
- Showed that sales peak in July and on Friday and Saturday evenings, and that large pizzas drive most revenue.

Credit Card Fraud Risk Dashboard | Power BI, DAX

- Built fraud KPIs (28.6% fraud rate, 286 cases) with filters by fraud type, state, and merchant.
- Showed identity theft as the largest fraud type (24%), and December and Maharashtra as the highest month and state.

European Real Estate Pricing Dashboard | Power BI, DAX, Maps

- Analysed 5,000+ listings across 10 cities with measures for price growth, price per m2, and days on market.
- Built a pricing risk model that classifies listings as overpriced, normal, or below district average.

Saudi Job Market Analysis | SQL, Power BI

- Structured Saudi job-posting data into a relational format and used SQL to find in-demand skills and sector concentration.
- Visualized the skills most often requested in analytics and BI roles.

More on GitHub: Retail Sales SQL Analysis, Netflix Content Analysis (SQL), Diwali Sales Analysis (Python), Mobile Sales Dashboard, Car Sales Dashboard, Library Management System (SQL), Excel Pivot Sales Dashboard, and Operations Data Quality Monitoring (Excel).
